DELIBERATIVE

Just sending along my initial redline plus a list of issues. This is draft legislation that MDE is proposing to try to get on the 2020 legislative calendar, which means they are working on it now. They have asked for a page turn first (which I will be scheduling, probably in a couple of weeks) followed by written comments.

By way of background, they are trying to merge a Dam Safety/water appropriation program and a nontidal wetlands program. This is a better attempt than their previous attempt. Below are bullets of some issues that we are still trying to think through before we talk with them. I understand Jeff will schedule some time with you next week or so. (Simma – I know you have a ton on your plate – if there's another OGC attorney, let me know.)

Also – note that bracketed material is existing statutory language that MDE proposes to DELETE. All caps and bold is proposed new language. Also – they are proposing to issue GPs to the counties, which I think, if I understood my email exchange with Kathy a couple of weeks ago, is ok.

DELIBERATIVE – DO NOT RELEASE

I am attaching a redline. Please note with respect to the underlying document that bracketed material is what MDE proposes to delete and bolded material is what they propose to add. As per my email the other day, I spoke with Jonathan. They are looking for us to set up a call or meeting (I think it can be a call) to do a page turn, and then they would like written comments to help facilitate any changes they need to make.

The following "big picture" issues should be discussed internally before being shared with Maryland. I'd like to forward to Kathy (whom I think is out) and Simma. Please lmk when I may do that.
